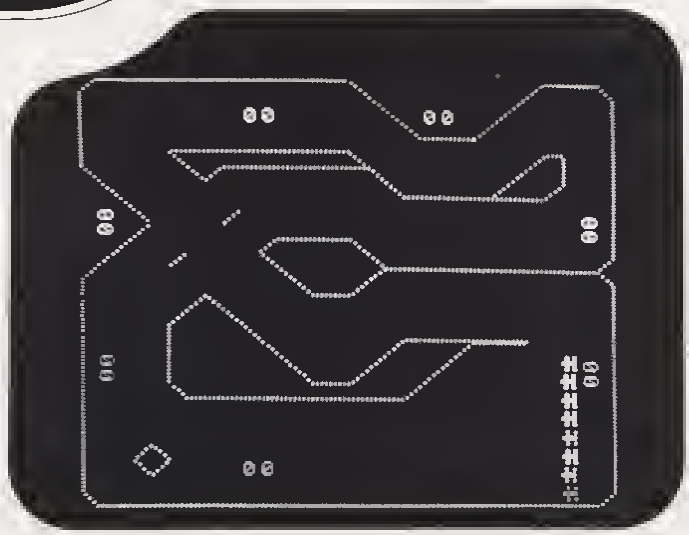
- **New! Players can select 4 different tracks.**
- **25″ GE color monitor.**
- **8 different colored cars.**
- **New computer controlled traffic feature.**
- **Built-in self-test program.**



Add more profit points to your championship standings, with all new Sprint 8™. It's hot! It's big track open wheel excitement, and, like its' all-time money winning stablemate Indy 800™, it's designed to roll over everything in sight.

New player features, faster steering and acceleration, and new operator options makes Sprint 8 the new one to beat

Four different tracks.
Sprint 8 drivers can select one of four different tracks—from easy to more difficult. Every driver will want to keep trying to improve speed and score on each course

New skill challenge—traffic on the track!
Eight cars are on the track during every race, whether one or eight players are driving. One player must drive through a 7-car pack, two through a 6-car jam, and so on. The "drone" cars are computer controlled so the competition always stays tough

New bigger track excitement.
Sprint 8's four tracks cover the entire color monitor for bigger action

10, 9, 8, 7, 6, 5, 4, 3, 2, 1 . . . Vroom!
New "countdown staging" adds more realism. When the first quarter is dropped, a start timer displayed on the screen begins a 10 second countdown sequence before the start

Each drivers' score, 10 points per lap, is digitally displayed in color matching the color of his car. Leaders' score flashes

Performance package.
Durable steel gas and brake pedals, 4 dual coin mechs, and locking boxes, round out Sprint 8's features (There's even built-in ash trays)

Engine roar, skid and crash sound effects add to the realism. And constantly changing tracks in the attract mode grabs attention in any location

Operator options.
New operator options include adjustable game time and master and individual volume controls

Long distance reliability.
Sprint 8 is designed to take it. Fewer parts (less than half of Indy 800's), proven race-tested circuitry, rugged steel frame construction and indestructible fiberglass top means your pit crew will be the lonesomest people on the track.

Exclusive self-test program.
To make minor adjustments fast, a built-in checkout sequence program tests all switches including gas, brake and coin with audible and visual readouts. It checks all *microprocessor and memory functions*.

Dimensions:
Height: 68″, 173 cm. Width: 44″, 112 cm. Depth: 44″, 112 cm.

You're not racing if you can't see your wheels . . .
Sprint 8 wheels that is! Your nearby distributor has all the specs. Or get in touch with us at Atari Inc., 1265 Borregas Ave., Sunnyvale, CA 94086 (408) 734-5310
